

Vendor Intelligence

Autonomous AI Vendor Due Diligence & Supply Chain Intelligence

Transform 90-day vendor assessments into 30-minute decision-ready intelligence.

The Vendor Risk Problem Has Outgrown Legacy Tools

Time & Cost Drain

Onboarding critical vendors consumes 3–4 months and costs \$15K–\$20K per assessment

Fragmented Data

Information scattered across emails, PDFs, spreadsheets, and disconnected portals

Static Reviews

Periodic snapshots while vendor risks evolve daily across financial, cyber, and ESG domains

Evidence Gap

Regulators demand verifiable proof, not questionnaire responses or subjective scores

Your due diligence process wasn't designed for today's scale, speed, or regulatory pressure.

The Pressure Is Rising — And Fast

Three converging forces are transforming vendor risk management from a back-office function into a strategic imperative.

Regulatory Pressure

- **LkSG (Germany):** Supply-chain due diligence with revenue-linked fines
- **EU CSRD/CSDDD:** Value-chain ESG reporting and board accountability
- **UFLPA:** Prove absence of forced labor in upstream suppliers
- **Modern Slavery:** Laws across UK, Australia, and California

Risk Pressure

- Third-party breaches now account for a significant share of all security incidents
- ESG and human-rights failures escalate to board-level crises within hours
- Cyber incidents spreading through supplier ecosystems

Operational Pressure

- Procurement teams managing exponentially more vendors
- Increased audit frequency and governance requirements
- Zero additional headcount to absorb the workload

❏ **Standing still is no longer an option.** Organizations that fail to modernize their vendor risk programs face regulatory penalties, reputational damage, and operational disruption.

Autonomous Due Diligence Across All Five Risk Pillars

Vendor Intelligence performs comprehensive, end-to-end due diligence across every critical dimension of vendor risk:

Delivered as:

- 30-minute decision-ready reports
- Continuous monitoring, not one-off reviews
- Actionable mitigation and contract recommendations

| "Not just risk scores – a strategy your risk committee can defend."

Your Virtual Analyst Team, Powered by Multi-Agent AI

Ingest & Discover

AI agents read vendor lists, questionnaires, and documents, then autonomously pull SEC filings, legal records, certifications, ESG reports / controversies, and regional /global news sources

Analyze & Correlate

Advanced algorithms perform financial modeling, ESG scoring, and sanctions checks while mapping ownership structures, geographic exposures, and concentration risks

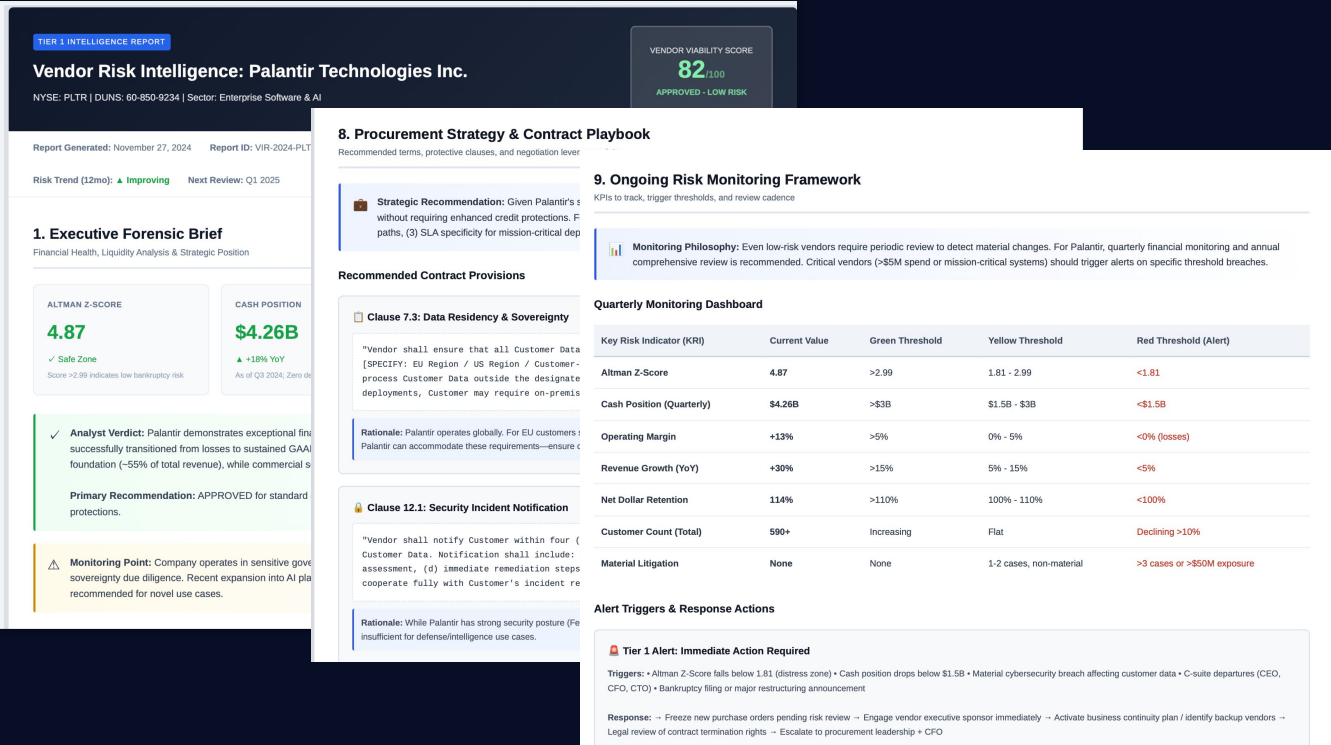

Report & Act

Generate comprehensive vendor intelligence reports with contract playbooks covering SLAs, exit rights, data residency, and security controls

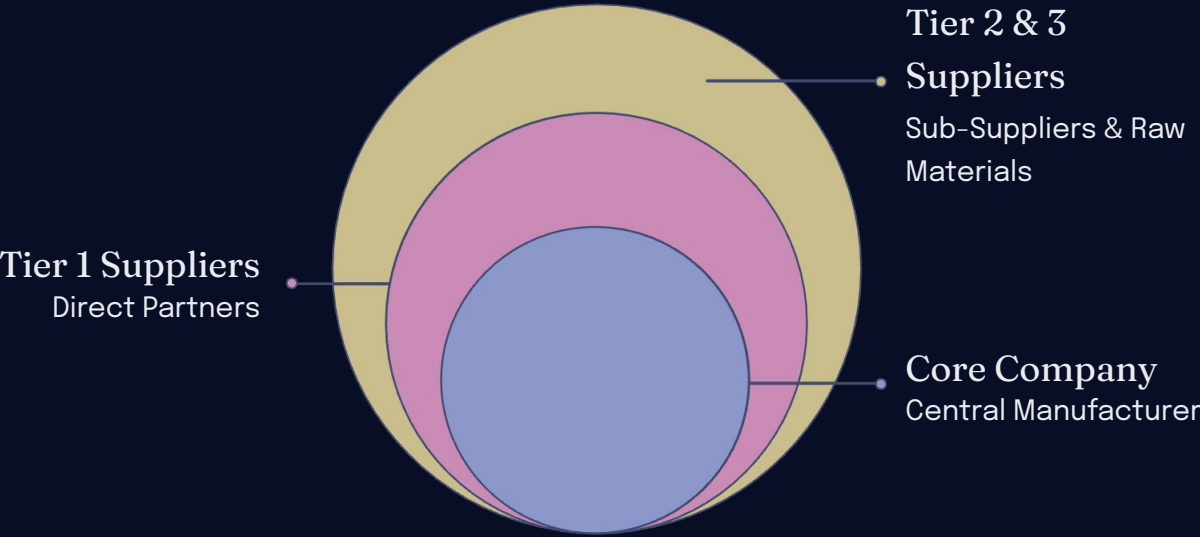

📄 **Enterprise-grade capabilities:** Multi-lingual processing, fully auditable decision trails, and secure architecture that meets the highest compliance standards.

Actionable Intelligence: Beyond the Score

Vendor Risk Report: Deep Insights

Supply Chain Ecosystem: Full Visibility

Viability Score: 82/100 (Approved – Low Risk)

- Detailed Financial Forensics with Peer Benchmarking
- Custom Contract Playbook with Clause Recommendations
- CAPA Recommendations for Identified Risks

- Acquisition History & JV Structures Mapped
- Tier 1/2/3 Supplier Visualization
- Geographic Concentration Analysis
- Single-Source Dependency Alerts

"We don't just hand you a score. We provide a **strategy**."

Impact Across Procurement, Risk & Confidence

Speed & Capacity

- Reduce vendor assessments from **3-4 months to 30 minutes**
- Handle **5-10X more reviews** without additional headcount
- Scale due diligence across global supplier portfolios

Risk & Compliance

- Strengthen defensibility for regulators and auditors
- Earlier detection of financial distress, sanctions, and ESG issues
- Continuous monitoring eliminates blind spots and surprises

Operational Excellence

- Dramatically shorter **time-to-contract** for critical vendors
- More reliable and resilient supplier portfolios
- Standardized, repeatable assessments across global teams

Lower Risk. Faster Onboarding. Higher Confidence.

Start With a 4 Week Pilot

Prove the value of autonomous vendor intelligence with a focused, results-driven pilot program designed to demonstrate immediate impact.

01

Select Critical Vendors

Identify 10-50 high-priority vendors for comprehensive AI-driven assessment

02

Benchmark Performance

Compare AI findings against your current manual processes for speed, depth, and accuracy

03

Deliver Risk Packs

Generate complete vendor intelligence reports with actionable recommendations for each supplier

04

Define Success Metrics

Establish measurable outcomes across speed, accuracy, coverage, and audit readiness

Let's run your top vendors through Vendor Intelligence – and show you the difference.

The Future of Vendor Risk is Autonomous

The gap between legacy vendor management and regulatory expectations is widening every quarter. Organizations that embrace autonomous intelligence now will lead their industries in risk management, operational efficiency, and strategic resilience. Vendor Intelligence isn't just a faster way to do due diligence – it's a fundamental transformation in how enterprises understand, monitor, and manage their extended ecosystems.

Ready to Transform?

Contact us to schedule a pilot program and see how Vendor Intelligence can revolutionize your vendor risk management.
